 **SmartBill**
Smart Billing For Utilities

COMPLETE UTILITY BILLING SOLUTION

WE MANAGE YOUR UTILITY BILLS, YOU MANAGE YOUR BUSINESS

SmartBill provides billing as a managed service solution for different verticals like Residential, Commercial, Retail and for Utility Companies. SmartBill can be provided for any type of utility like electricity, gas, water, chilled water, solar energy, etc.

SmartBill makes utility bill management effortless. Our utility bill management tools streamline the bill collection, validation and payment process, and provide you with transparency and visibility into utility bill data.

SmartBill also enables customers to make statutory filing of returns connected to consumption of your connected load.

STREAMLINED PAYMENTS

Utility bills from all your sites in one place with auto-generated accounts payable files make your bill-pay effortless.

DATA ANALYSIS AND TRENDS

Make important cost, usage and other utility data accessible across your business

BILL VALIDATION

Ensure your utility payments are accurate every time with our exhaustive bill validation process.

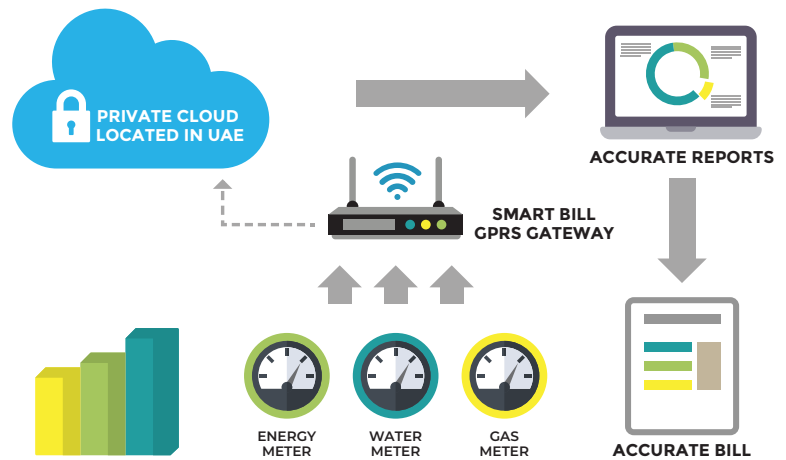

ARCHIVED BUILDING AND ACCOUNT DETAILS

Access a comprehensive summary of site, account and historical billing information for every facility in your portfolio whenever you need it.

THE BILLING PROCESS

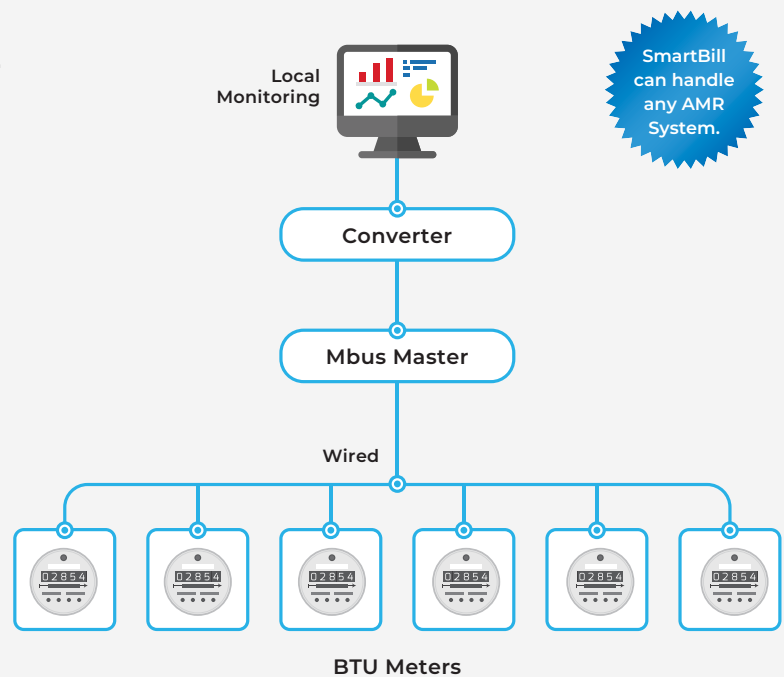

CLOUD ARCHITECTURE

The Enterprise version of SmartBill is ideally meant for deployment on a cloud server. The Admin portal, The Corporate portal and The tenant portal together makes it a unique 360 degree solution for managing large number meters spread across multiple buildings / locations.

ON PREMISES ARCHITECTURE

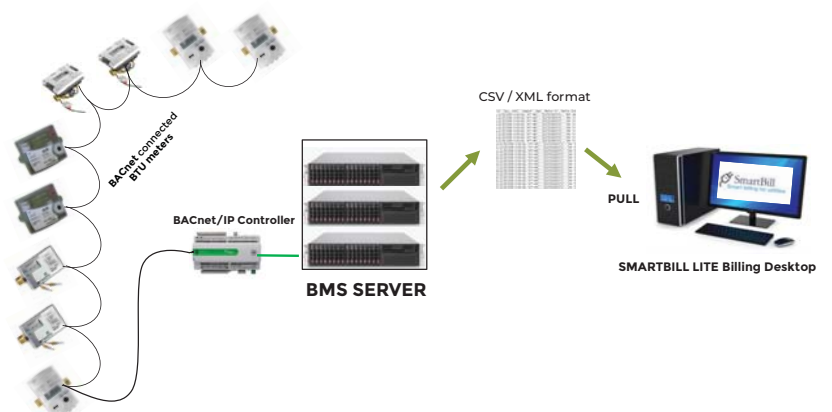

SmartBill-Lite is specifically meant to meet the needs of single location on premises billing requirements. It is possible to provide remote connectivity to manage the billing system in multiple ways. Our experts will guide you on various options to achieve this.

CONNECTIVITY TO BMS SYSTEMS

SmartBill is capable of integration with different protocols and existing systems. Integration with customer SCADA systems, BMS systems, Oracle / ERP systems, Customer web portal etc can easily be achieved. Our expertise can help the customer achieve a seamless utility billing system meeting their wish list.

LOW TOTAL COST OF OWNERSHIP

Our in-house R&D and customer support enables us to offer improvements t customizations / AMC available to the customers at very low prices - resulting in low cost of ownership

SHOPPING MALLS

SmartBill is available for electricity, water and chilled water billing for the shopping malls. This will enable the mall management to send out accurate, timely bills to their tenants. Features include easy online & offline payments, accounting/ consumption reports to the tenant and mall management in real-time etc .

COMMERCIAL BUILDINGS

Commercial tenant sub metering and billing solutions available for office buildings. By implementing sub metering practices in these faculties, building managers can manage tenant bills and statutory filing requirements without any difficulty

RESIDENTIAL BUILDINGS

SmartBill along with Smart Meters and in-home displays (IHDs) help to give residential users more control over energy consumption and meet environmental and statutory compliance requirements. The developer /owner's association is also benefited through easy utility billing management.

RESIDENTIAL COMMUNITIES

Residential communities pose huge challenges to property developers in terms of generating accurate utility bills and also in timely collection of these bills. Wrong and inaccurate bills can result in bad image and even affect the property value and property rentals.

SOLAR MICRO GRIDS

SmartBill uses intelligent solar electricity network management platform in residential and office buildings, industries, shopping malls. etc. to manage and optimize customer's demand and issue accurate bills.

UTILITY COMPANIES

SmartBill enables utility companies to automate almost 100 percentage of the billing process. From meter reading to invoice compilation and payment processing. SmartBill will give everything that a utility company needs to monitor and manage their entire billing process.
